

Additional Precautions Added To Our Daily Cleaning Routine

Dear BSOOB Transit customers,

BSOOB transit employs a full-time person to clean our buses inside and out. Well before the coronavirus was in the news, BSOOB Transit purchased new disinfecting agent and an electrostatic spray gun to better ensure that our buses are clean. We mop the floors and wipe down surfaces regularly.

As information about the coronavirus began hitting the news, we immediately implemented a more aggressive approach to our cleaning and disinfecting procedures. Disinfecting spray was increased to every day. Surfaces are wiped down with disinfecting wipes and floors are mopped every day as well.

During layovers and between shifts, drivers are encouraged to wipe down railings and any surfaces touched by passengers. Customers are encouraged to use caution and common sense when boarding and exiting the bus. Please follow the CDC recommendations for washing your hands and other measures to protect yourself and others. If you are sick, please stay home.

A link to a recent news report showing our commitment to keeping our customers and employees safe follows this statement. Please take a moment to watch it.
